Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Ch

DETAILED ACTION

1. Amendment filed on has been received.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 8,9,11,12,24,25,27, and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

On page 30 lines 8-16 of the specification, it is stated that the elected embodiment provides a generally uniform force regardless of the amount of wear. Applicants have argued that the amount of force changes as the device wears. It is unclear which is correct. A decreasing spring rate does not mean the force applied is lower (for instance the displacement could increase).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3683

5. Claims 8, 9, 12, 24, 25, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Evans (U. S. Patent no. 5,549,181).

Evans discloses a caliper 20, friction pads 15,16, anchor bracket 12,13, spring 30 with a first portion 33 and a second portion 33 that yields with wear of the brake pad (see column 6 lines 63-67).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 11, 23, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evans in view of Aoyagi.

Evans is relied upon as above. Evans does not disclose a portion of the spring spaced apart from a friction pad surface. Aoyagi teaches a portion of the spring spaced apart from a friction pad surface. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have a portion of the spring spaced apart from a friction pad surface as taught by Aoyagi in the device of Evans in order to allow some movement before the spring permanently deforms.

8. Claims 1-5,7,17-21, and 23 are allowed..
